
Self Build Research

Posted by Duck - 2008/10/08 17:08

I am a 5th Year Architecture student at the Welsh School of Architecture and am currently researching my dissertation on Self-Build projects in the UK. I am investigating the extent to which they are environmentally friendly and develop into strong communities.

As part of the research I need to survey people who have completed (or are in the process of completing) a Self Build project. If you think you can help me out, by completing a short questionnaire, I would really like to hear from you.

B)
Thanks

Lawrence

Hi Lawrence

I guess most people on the site are interested in building and have not built yet. If the timing is not too late please email me the questionnaire to jackson@ecomotive.org
